

PRIME WHEY PROTEIN

2,28 kg / 60 servings

Premium Whey Protein mix of isolate and concentrate plus peptides

Prime Whey is the improved version of our already superb 100% Whey Protein. This product has been developed for ambitious athletes and that's why we've worked on all the key aspects of the whey protein supplement.

Through adding whey protein hydrolysate (WPH) and whey protein isolate (WPI) we have increased resorption speed and protein content. Finally the total BCAA amount is increased also. Because this is for the ambitious athlete we have the serving size and now we have 30g of protein, 6.700 mg BCAA per serving with incredible super fast digestion and perfect taste.

As all our powders it is fully instantized, that means it is incredible good soluble and you can mix it without a shaker without lumps. This is of course interesting for other uses as well, e.g. cooking your porridge or making quark dishes.

Of course we still do not use standard artificial sweeteners as the competition but only Sucralose and stevia.

It was very difficult to achieve the incredible good taste because WPH tastes normal quite bitter but through a special production process and good raw material we could achieve our famous Z-Konzept taste.
