Fast Hydration Sports Drink

Our Pro Isotonic Drink refreshes you in no time and at the same time provides you with fresh energy as quickly as possible carbohydrates, 8 vitamins, 4 minerals/electrolytes and liquid.

Isotonic means for sportsman's practice that the drink has the same particle concentration (content of minerals, proteins and carbohydrates) as your blood. As a result, the liquid is absorbed by the body faster than water. This also means that the minerals lost by sweating and other important substances are replenished more quickly.

Manufactured in Germany, Pro Isotonic Drink meets the highest quality standards for dietary supplements and has been specially developed for professional use. The carbohydrates maltodextrin and dextrose quickly give your muscles maximum energy. We have deliberately dispensed with fructose, which leads to stomach problems in some athletes. Pro Isotonic Drink is therefore well tolerated and works quickly. So you can also keep up with long training and competitions and develop your full power.

Before and during your sporting activities or whenever you want to rehydrate.
